Akshat Srivastava

2H/R/3T O.P.S Nagar, Kalindipuram, Prayagraj, Uttar Pradesh - 211011

9369158685 akshatsri.work@gmail.com LinkedIn GitHub Portfolio

Education

Vellore Institute of Technology **Jun 2023 – Jun 2027**
Bachelor of Technology in Electronics and Communication Engineering *Chennai, Tamil Nadu*

Tagore Public School **Jun 2021 – Jun 2022**
Class 12 (CBSE Board) *Prayagraj, Uttar Pradesh*

Tagore Public School **Jun 2019 – Jun 2020**
Class 10 (CBSE Board) *Prayagraj, Uttar Pradesh*

Technical Skills

Languages: Java, JavaScript, Kotlin, Python, SQL, HTML/CSS
Frameworks: React Native, Node.js, Express.js, Next.js
Databases: MongoDB, Firebase
Developer Tools: Git, GitHub, Android Studio, VS Code, Jupyter Notebook
Concepts: REST APIs, OOP, Data Structures and Algorithms, System Design Principles

Projects

VInhance VTOP Extension | *JavaScript, Chrome Extension APIs* GitHub | Live

- Developed a browser extension to enhance VTOP usability by improving UI/UX and adding custom features without backend access.
- Implemented features such as dark mode, improved navigation, and dynamic content modification using DOM manipulation.
- Optimized performance through efficient event handling and minimized script execution time.
- Enhanced user experience by restructuring layouts and reducing clutter across academic dashboard pages.
- Published on the Chrome Web Store with 200+ installs, helping VIT students improve their VTOP experience.

Satellite-Based Urban Growth Analysis | *JavaScript, Google Earth Engine* GitHub

- Developed a web-based application to analyze urban growth using multi-temporal satellite imagery.
- Processed and visualized satellite data to identify land cover and urban expansion across different years.
- Integrated interactive maps and geospatial visualizations for comparative analysis.
- Built an intuitive interface for exploring satellite imagery and change detection results.

Expensify (Expense Tracker App) | *React Native, Node.js, MongoDB, Express.js, Firebase* GitHub | Live

- Developed a full-stack cross-platform expense tracking application with secure Firebase authentication.
- Designed RESTful APIs using Node.js and Express.js for managing income, expenses, and user transactions.
- Integrated OCR-based receipt scanning to automatically extract merchant, amount, and date from receipts for instant expense logging.
- Built dashboards with expense categorization, balance tracking, analytics, and transaction history, and deployed the backend on Railway.

Weather App | *Java, Kotlin, Firebase, Android Studio* GitHub

- Developed an Android application to display real-time weather information using REST APIs.
- Implemented Retrofit for efficient API communication and JSON parsing.
- Designed a responsive interface displaying temperature, humidity, wind speed, and weather conditions with proper error handling.

Research

CCPS Internship - VIT Chennai **2026 – Present**

Research Intern

- Working on the development of a pedestrian detection system using Vision Language Models (VLMs).
- Researching advanced object detection and contextual scene understanding for real-world applications.
- Improving model accuracy and performance for pedestrian identification tasks.

Land Cover Change Detection using SAR **2026 – Present**

Research Project

- Researching land cover change detection using multi-temporal SAR imagery.
- Exploring supervised machine learning techniques for land cover classification.
- Analyzing publicly available remote sensing datasets for model evaluation.
- Reviewing advanced microwave imaging methods for robust change detection.

Experience

HackClub **August 2024 – January 2026**

App Development Lead *VIT Chennai*

- Led the App Development Department, mentoring members and coordinating technical initiatives.
- Collaborated with team members to build and improve community-driven software projects.
- Participated in and won hackathons while contributing to applications used by university students.
