Education

Vellore Institute of Technology **Jun 2023 – Jun 2027**
Bachelor of Technology in Electronics and Communication Engineering *Chennai, Tamil Nadu*

Technical Skills

Languages: Java, JavaScript, Kotlin, Python, SQL
Frameworks: React Native, Node.js, Express.js, Next.js
Databases: MongoDB, Firebase
Developer Tools: Git, GitHub, npm, Android Studio, VS Code, Jupyter
Concepts: DSA, OOP, DBMS, OS, CN, System Design, REST APIs

Projects

KnowBase — Enterprise Knowledge Platform | *React, Node.js, Express.js, MongoDB, Qdrant, Gemini* GitHub | Live

- Built a **multi-tenant RAG platform** for querying company documents using natural language.
- Implemented **JWT authentication and organization-level access control** using verified corporate email domains.
- Built a PDF-to-vector pipeline with **text chunking, embeddings, Qdrant retrieval**, and Gemini responses with source citations.

VInhance VTOP Extension | *JavaScript, Chrome Extension APIs* GitHub | Live

- Built a **Chrome extension** using JavaScript and Chrome Extension APIs to enhance the VTOP user experience.
- Implemented **dark mode, improved navigation, and UI enhancements** through dynamic **DOM manipulation**.
- Optimized **event handling and DOM interactions** to improve extension responsiveness and performance.
- Published the extension on the Chrome Web Store, reaching **200+ installs**.

Satellite-Based Urban Growth Analysis | *JavaScript, Google Earth Engine* GitHub

- Built a **web application for urban growth analysis** using satellite imagery.
- Processed **multi-temporal geospatial data** with Google Earth Engine.
- Visualized **land cover changes** through interactive maps.

Expensify (Expense Tracker App) | *React Native, Node.js, Express.js, MongoDB, Firebase* GitHub | Live

- Built a **full-stack expense app** with Node.js/Express.js and **RESTful CRUD APIs** for expenses, income, and transactions.
- Developed **backend middleware** and integrated **MongoDB** for persistent storage of financial records and transaction history.
- Integrated **OCR-based receipt scanning** to extract expense details and automate expense entry.
- Deployed the backend API and built **dashboards for income, expenses, balance tracking, and transaction history**.

Experience

HackClub **August 2024 – January 2026**
App Development Lead *VIT Chennai*

- **Led the App Development Department**, mentoring and coordinating a **team of 50–60 members** across technical initiatives.
- Coordinated development of **2 community-driven software projects**, collaborating with team members across design and implementation.
- Contributed to applications used by **VIT Chennai students** and supported technical initiatives within the developer community.

Research

Land Cover Change Detection using SAR *Research Project* **2026 – Present**

- Researching **land cover change detection** using multi-temporal SAR imagery.
- Exploring **supervised machine learning techniques** for land cover classification.
- Analyzing publicly available **remote sensing datasets** for model evaluation.
- Reviewing advanced **microwave imaging methods** for robust change detection.
